
SPY windows ending in 2024 or 2025 (501 on the published inputs, 502 on the rebuilt series), each re-classified from its stored 30-day sequence. Heavy frame and rings: the published thresholds (70%, $5B, 5 flips). Across the 45 threshold sets the published-input rate exceeds the rebuilt rate by 70.7 to 96.0 percentage points.
